Reflection on Assignment 1 – NALI 2023

The NALI 2023 is held on 7 and 8 November 2023 at Dewan Sultan Iskandar (DSI). This exhibition is about Information and Commutation Technology. NALI is an annual knowledge-sharing event organized by Universiti Teknologi Malaysia (UTM), through the Center for Advancement in Digital and Flexible Learning (UTM CDex). NALI also stands for New Academia Learning Innovation, a framework to promote innovative teaching and learning practices in education. It was a very knowledgeable event as we can see the real-life application of IT. This really opens our eyes and able to explore new technologies, products, application software and so on.

We had interviewed a total of 5 booths during the exhibition, which are PROBASED, EXPERIENTIAL LEARNING THROUGH GAMIFICATION, UTM ECO Mobile App, Mini Industry NXTPRIME: Burger Factory, and Archvision VR: Empowering Next-Gen Architects Through Immersive Design Pedagogy.

In conclusion, I think NALI is a great activity for developers, lecturers, and students. People can share innovation ideas and make it into real life application to solve problem and use technologies and digital to improve our daily life.
